Full-Stack Engineer at Stori and Tech Lead at Credifacil. I build web, mobile and financial products, coordinate developers and work with SEO, marketing and infrastructure teams.

TECHNOLOGIES

Languages and frontend: TypeScript, JavaScript, Go, Python, React, Next.js, Vue.js, React Native.

Backend and data: Node.js, NestJS, Express, PostgreSQL, MySQL, Prisma, MongoDB.

Infrastructure: AWS, Terraform, CDK, S3, Glacier, Lambda, Firebase, CI/CD.

Product and teams: Amplitude, AppsFlyer, Braze, ClickUp.

AI and security: MCP, Auth0, OAuth, Google Sign-In, observability, SDD.

EXPERIENCE

Stori

Full-Stack Engineer

Oct 2025 - present · Full-time · Remote

- Work in Growth, in the Acquisition squad. My team owns storicard.com, Referrals, Mystery Box and WUAP.
- WUAP (Web Unified Acquisition Process) lets users start registration on the web and finish in the app through deep links.
- Built an internal tool to manage teams, landing pages and SEO, with customizable pages. Develop web experiences focused on performance and accessibility.
- Use Go, Python, Next.js, Vue.js, FinClip and Flutter. Work with infrastructure teams using AWS CDK.
- Work with SEO and Paid Marketing on campaigns and integrations, with tracking through Amplitude, Braze and AppsFlyer.

CREDIFACIL SAFyM

Tech Lead

Oct 2025 - present · Freelance · Remote

- Coordinate the development team, define technical standards and mentor developers. Organize work with ClickUp.
- Design and coordinate architecture for the Onix/Arriba ecosystem and its Core API.
- Work with infrastructure teams using Terraform and CDK. Oversee CI/CD pipelines and multi-environment deployments.

Senior Full-Stack Engineer

Dec 2023 - Oct 2025 · Full-time

- Developed credit and collections features, and Node.js services using the AWS SDK.
- Designed document digitization workflows with S3 and Glacier. Mentored developers and reviewed code.

Full-Stack Developer

Aug 2022 - Dec 2023 · Full-time

- Developed Arriba Comercio, a platform used by more than 2,000 merchants and 4 financial companies.
- Worked on the full migration from .NET to Next.js, integrating signatures, credit management, documents, roles and permissions.

EXPERIENCE

Litisnet · Full-Stack Developer

Jun 2023 - Nov 2024 · Freelance · Remote

- Built a legal case and document management platform with Next.js, Prisma, MySQL and Firebase.
- Implemented CRUD modules, relational search, authentication, permissions and bulk imports from Excel.

Fiesta BRESH · Full-Stack Developer

Mar 2022 - Oct 2022 · Freelance

- Built a landing page and REST API for events and campaigns using Firebase Auth, MongoDB and Express.
- Implemented internal dashboards and user registration, enrollment and access-control flows.

Pioeral.com · Back-End Developer

May 2022 - Jul 2022 · Full-time

- Built REST APIs with Express, Firebase Auth, PostgreSQL and Sequelize, and integrated Rapyd and Mercado Pago.
- Handled deployments and maintenance on GoDaddy, Vercel and Heroku.

Henry · Full-Stack Teaching Assistant

Mar 2022 - May 2022 · Part-time

- Supported students as they joined study groups and provided technical guidance through the bootcamp's first modules.
- Guided exercises, pair programming and project reviews, combining technical mentoring, communication and teamwork.

SELECTED PROJECTS

Applied AI · Mentoring, MCP and migrations

Propose AI-based solutions and support teams through teaching, mentoring, weekly Learning IA sessions and hands-on team projects. Contributed to Onix's first MCP server and its security, integrating Auth0 with OAuth, Google Sign-In and observability. Encouraged developers to build tools and agents on the MCP. Carried out migrations using AI and methodologies such as SDD.

Arriba Clientes · React Native / SUNMI

Built the new App Comercios app for Android and SUNMI terminals: customer registration, documents, and receipt and credit-voucher printing. Optimized for devices with 900 MB of RAM and older Android versions.

Onix / Arriba ecosystem

Work on Arriba Aplicación, available on Google Play, the arribabilletera.com website, Arriba Verify and the Onix Core API. Contributed to the Core API migration from .NET to NestJS and a microservices architecture.

Yenu · FlutterFlow / Supabase / Firebase

Worked on a sports team and event management app. Implemented push notifications and PostgreSQL views in Supabase for queries.

EDUCATION

Escuela de Educación Secundaria No. 13 “Cap. Fgta. Carlos M. Moyano”

Secondary education with a focus on Economics and Human Resources Management · 2016–2021.

Henry

Full Stack Developer bootcamp · Jan - Apr 2022 · Over 800 hours of hands-on training.
